ENHANCE YOUR SPACE

At AVID Audio we are genuinely passionate about audio visual interior design. Our aim with our inspirational creative thinking, is to produce a viewing and listening experience beyond your wildest expectations. For the home, office, bar, restaurant, gym or retail space we have the perfect solutions to help you get the most pleasure from your sound and vision equipment. We have a combined experience of over 45 years in the audio visual field. Our client base covers homes across the whole of the northwest and includes several commercial projects such as new housing estates, apartments and a variety of businesses. There are many features of our unique personal service that at first you may not be aware of...

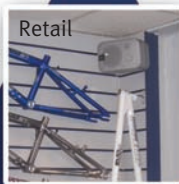

UNDERSTANDING YOUR NEEDS

Constantly changing technology can be confusing, leading you to make the wrong purchase. Our expert knowledge will ensure you are consulted about the right audio visual products which suit the placement and complement your decor. We never use 'hard sell' techniques, we simply offer impartial, jargon-free advice in order to tailor a package best suited to your viewing and listening requirements – whether for the home or a commercial application. From a simple tidy up of wires behind a TV to pre-wiring an apartment block, no job is too small or too large, we do as much or as little as you require.

PLANNED PERFECTION

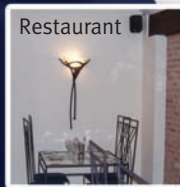

An AVID Audio Survey is completely free of charge, without obligation and arranged at a convenient time to suit you. The relaxed, informal discussion is tailored to your individual requirements and to your specific budget, whether you need one television, a television in every room, or a full pre-wire of an housing development. For domestic surveys, we don't over-stay our welcome, and it doesn't need to be a lengthy meeting, unless of course you want to pick our brains! Commercial installations by their very nature need a longer survey. We like to be consulted as early as possible, as thorough planning from the start will avoid costly mistakes and unnecessary inconvenience later. We provide all customers with a quote and written specification of the product and placement, once you are happy with that, we quickly arrange a custom installation so that you can start enjoying your new system.

MULTI-ROOM MADE SIMPLE

AVID Audio introduce the Sonos® Multi-Room Music System - before Sonos®, if you wanted music in every room of your home you had to break through walls to hard-wire the premises. With Sonos® you can play music throughout your home wirelessly, in as many different rooms as you like, controlling it all from the palm of your hand. Easy intuitive setup makes Sonos® ready to enjoy right out of the box. With full-colour Sonos® wireless controller in hand, everyone in your family can have their music wherever and whenever they want. Sonos® liberates the music stored on your PC, Mac or Network, works seamlessly with select online music services such as Napster®, and lets you tune into radio services and a whole world of radio stations from the internet.

CUSTOM INSTALLATION

Understandably you'll want everything in your home or business to be pleasing to the eye, with no unsightly tangles of cables on show! With thoughtful planning at an early stage we can ensure the best route for wiring and discreet positioning of aerial, speaker and equipment connections. Once we've planned the ideal solution for you, we schedule a delivery and installation to be carried out carefully and efficiently at your convenience. Our skilled technicians use quality components and work to the highest standards of workmanship. All installations are executed with respect for your furnishings, there's no fuss and no-mess – we also remove all unwanted packaging, and before leaving you we ensure you can operate your equipment.

Any song.
Any room.

CREATIVE THINKING

Customers nowadays want bigger screens in order to enjoy a cinema experience in the comfort of their home. You can choose from large plasma displays, LCD displays, or a complete home cinema experience with front projection, which can be made to disappear from sight when not in use.

A new addition to our portfolio is TV placement into the 'wet' areas of the home including, shower rooms, steam rooms and bathrooms.

On a musical note... we can advise you about the very latest loudspeaker technology and offer products for both discreet positioning to meld with surrounding decor, or to feature as a stylish and functional piece of furniture!

And don't forget the garden! Why struggle to hear your music system playing full power in the lounge - our new Outcast speaker system lets you enjoy moveable music outdoors. The unit is wireless, waterproof and illuminated for night-time use, ideal for outdoor living and entertaining.

CHOICE

AVID Audio has close relationships with their preferred quality manufacturers which includes: Harman Kardon, Sonos, JBL and Monitor Audio amongst others. We are also perfectly happy to install or upgrade your own equipment – including plasma screens on walls and re-siting of existing speaker systems. Give us a call or visit our website for more information or to book a free no-obligation AVID Audio Survey.
